
APPENDIX A

SELECTED BIBLIOGRAPHY

A selected bibliography has been compiled to include some references that are specific and related to system engineering and the implementation of supporting activities in this area. By becoming familiar with the literature, the reader should gain some additional insight into the system engineering approach and its application in the design and development of new systems and/or the reengineering of existing systems. Specific areas covered by these references include the following:

- Systems, Systems Engineering, and Systems Analysis
- Concurrent Engineering
- Software and Computer-Aided Systems
- Reliability Engineering
- Maintainability Engineering and Maintenance
- Human Factors and Safety Engineering
- Logistics, Logistics Engineering, and Integrated Logistic Support (ILS)
- Production, Manufacturing, Quality, Quality Control, and Quality Assurance
- Operations Research and Operations Management
- Engineering Economy, Life-Cycle Cost Analysis, and Cost Estimation
- Management and Supporting Areas
